

SP4 Layer Matrix

This bank matrix was used as a guide to combine the majority SP4 Program sounds and audition them as 1x1 Layers (saved as Setups)

Drums bank 2A excluded

Layer-auditioning Approach:

- Every sound in relevant Program bank-1 layered with every sound in relevant Program bank-1 for auditioning
- Every sound in relevant Program bank-1 layered with every sound in relevant Program bank-2 for auditioning
- Sounds from relevant banks not layered for auditioning as not expected to generate a useful sound Setup

Post-auditioning, only useful layers were selected for inclusion in the SPSetups Banks #1-12

Some layers consisting of a Guitar, Synth or String Program, combined with a Bass Program, were useful, but are not currently included in the SPSetups Banks #1-12 (but examples can be available upon request in SPX format)
